Reading Response

Read the passage twice. Answer in complete sentences and use evidence from the text.

Name: _____

Monarch butterflies travel up to 3,000 miles each fall. They fly from Canada and the United States to the same forests in central Mexico, even though no single butterfly has made the trip before. Scientists think monarchs use the position of the sun and Earth's magnetic field to find their way. In spring, the butterflies head north again, laying eggs on milkweed plants along the route.

1. What is the main idea of the passage?

2. How far can monarchs travel? Quote the text.

3. What two things might help monarchs find their way?

4. Why are milkweed plants important to monarchs?

Brain-Break Cards

Cut apart and keep in a cup. Draw one when the class needs a 2-minute reset.

Freeze Dance

Dance to music and freeze when it stops.

Animal Walk

Walk like a bear, hop like a frog, waddle like a penguin.

Count & Jump

Count to 20 with a jumping jack on every number.

Mirror Me

Copy a partner's slow-motion moves.

Rainbow Breath

Breathe in for 4, hold for 4, out for 4. Repeat 3 times.

Tree Pose

Balance on one foot for 10 seconds, then switch.

Simon Says

Two minutes of the classic, quiet voices.

Shake It Out

Shake hands 5 times, feet 5 times, then wiggle all over.

Touch & Go

Touch something blue, something round and something soft (safely!).

Chair Push-Ups

Hands on the desk, 10 slow push-ups.

Silent Ball

Toss a soft ball without talking. Drop it? Sit down and cheer quietly.

Stretch Up

Reach to the sky, touch your toes, roll your shoulders.

Parent Communication

Send home weekly. A quick note from the 4th Grade classroom.
